

# Universal Health Organisation (UHO)

*People's Health in People's Hands*

**Date:** 25 Mar 2022

**To:** Health authorities and Covid task forces at all administrative levels

**Subject:** Questions on Covid-19 vaccination program

The mainstream Covid narrative has been pushing Covid-19 vaccines for everyone, including children. We raise several questions in this context.

1. What percent of children have been found to be having antibodies in the serosurvey by ICMR done in 2021?
2. What proportion of children in <18 years of age that were affected by covid died due to covid in 2020 and 2021? What proportion of those died had associated comorbid conditions?
3. What is the “emergency” to grant EUA to vaccines for children?
4. If NTAGI did not recommend vaccination for children, what body of experts decided to introduce vaccination for children?
5. What are the scientific and epidemiological rationales for taking such a decision going against recommendations of NTAGI?
6. Is trial data of these vaccines granted EUA published or available in public domain? If yes, please provide.
7. Since the launch of vaccination in Jan 2021, how many adverse events have been recorded? Is this data available to the public?
8. Is there any guideline to suspend or stop vaccinating children if there are reports of deaths due to AEFI with covid vaccine? If yes, how many such deaths to be reported before stopping vaccination?
9. Of these AEFI, how many have resulted in death? What is the age wise distribution of these deaths?
10. Is any mechanism to obtain informed consent from the individual receiving vaccine and is it oral or written? If written, what is the format?
11. Is there any voluntary reporting system for reporting of adverse events following immunization? If yes, what is the system of reporting and website details?
12. How the causality of death due to AEFI established and which agency is responsible to do that?
13. Are the postmortem examinations being carried out in such death cases following vaccination which happen in otherwise healthy individuals?
14. What is the mechanism to ensure fairness, transparency and independence of such system (AEFI Committee)?
15. In case of deaths following vaccination, is there any compensation mechanism by the government? If yes, who pays and how much?
16. In the one year period April 2021 to March 2022, how many deaths have been recorded month wise amongst various age groups in different categories of unvaccinated, one dose, two dose and precaution/third dose?
